PROFESSIONAL EXPERIENCE

Financial Crimes Model Analytics Officer I

Apr 2025 – Present

Truist Financial

Charlotte, NC

- Served as a key member of the Financial Intelligence Unit analytics team, collaborating with Quantitative Analytics and Model Development to support advanced client risk rating model validation and performance monitoring.
- Performed complex statistical analysis using SAS and Python to assess model accuracy and stability, conducting threshold tuning and gap analyses to optimize performance across customer data.
- Designed and implemented advanced analytics frameworks for ongoing model monitoring, creating sophisticated control charts and statistical tests to detect performance degradation and ensure continuous model effectiveness.
- Led analytical research initiatives to evaluate new risk factors and modeling approaches, conducting impact assessments and feasibility studies that support strategic decisions in financial crimes risk management.

Data Engineer

Jun 2024 – Apr 2025

Spare-it

Boston, MA

- Led collaboration across internal engineering teams and external partners, aligning tasks, facilitating communication, and tracking sprints to bridge technical gaps and ensure successful development of an IoT-based analytics platform.
- Built an ETL pipeline and refactored its codebase for efficiency, aligning AWS Glue crawlers and ETL jobs with business needs, reducing redundant runs and saving around \$1,500 monthly as tracked in AWS Cost Analytics.
- Optimized query performance by leveraging DynamoDB and Spark API, utilizing batch reading with DynamoDB's RCU capabilities, reducing data fetching time by 43% and resolving memory issues in large dataset processing.
- Ensured data accuracy before feeding metrics into QuickSight by validating inputs in the development pipeline, providing reliable insights for stakeholders.

Software Engineer Intern

May 2023 – Jan 2024

BU Spark

Boston, MA

- Served as the technical lead on three projects, working closely with the project manager to write technical documentation, communicate with stakeholders, and provide progress updates to ensure project alignment.
- Automated testing and deployment processes via CI/CD pipelines with Docker and GitHub Actions, improving system reliability and reducing manual testing by 60%.

Data System Engineer

Sep 2020 – Jun 2022

Air Force – South Korea

South Korea

- Maintained a database system managing millions of critical electronics and equipment inventory records, ensuring 99.9% uptime for mission-critical operations across the Air Force.
- Automated data analysis and reporting processes, reducing manual work by 70% and lowering data inaccuracies by 90%, enhancing data reliability.

EDUCATION

Boston University

May 2024

Bachelor of Arts in Computer Science

Boston, MA

SKILLS

- **Programming Languages:** SQL, SAS, Python, TypeScript, JavaScript
- **Technologies & Tools:** PostgreSQL, DynamoDB, AWS (S3, EC2, QuickSight), Docker
